

Question: How do you turn on or off subtotal of payments on receipts?

Answer: Many shops do not like to print a subtotal of payments on receipts, particularly if the loan has been open for a long time. You can now control whether or not subtotals are printed. Click on **Office -> Configuration -> Master Configuration**.

Next click on the "options" tab.

Next Enter a no." 1" next to the option that says "totals on pawn payment receipts" to turn the option off and "0" to turn the option on.

The options listed here are GLOBAL. They affect all stores in all stores. They are specialized changes and features created by tech support for special circumstances.
DO NOT CHANGE THEM UNLESS INSTRUCTED BY TECH SUPPORT.
